Mellanox® MCP7F60-W02AR26 Compatible 400GBase-CU QSFP-DD to 4xQSFP56 Direct Attach Cable (Passive Twinax, 2.5m)

Product Description

This is a Mellanox® MCP7F60-W02AR26 Compatible 400GBase-CU QSFP-DD to 4xQSFP56 direct attach cable that operates over passive copper with a maximum reach of 2.5m. It has been programmed, uniquely serialized, and data-traffic and application tested to ensure it is 100% compliant and functional. We stand behind the quality of our products and proudly offer a limited lifetime warranty. This cable is (Trade Agreements Act) compliant and is built to comply with MSA (Multi-Source Agreement) standards.

Skylane's transceivers are RoHS compliant and lead-free.

Features:

- Compliant with QSFP-DD MSA Specification Rev 3.4
- SFF-8636 management interface support
- SFF-8679 electrical interface compliant
- Supports aggregate data rates of 100 and 400Gbps
- I2C for EEPROM communication
- Compatible with IEEE 802.3bj, IEEE 802.3by, IEEE 802.3cd
- Excellent EMI/EMC performance 360-degree cable shield termination
- Pull-to-release slide latch design
- Low loss, stronger mechanical features, more flexible
- Advantage dual side pre-solder automated assembly technologies
- RoHS Compliant and Lead-Free

Applications:

- Switches, Servers and Routers
- Storage Area Networks
- Data Center Networks
- High Performance Computing

For your product safety, please read the following information carefully before any manipulation of the transceiver:

ESD

This transceiver is specified as ESD threshold 1kV for SFI pins and 2kV for all others electrical input pins, tested per MIL-STD-883G, Method 3015.4 /JESD22-A114-A (HBM). However, normal ESD precautions are still required during the handling of this module.

LASER SAFETY

This is a Class1 Laser Product according to IEC 60825-1:2007. This product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated (June 24, 2007).

The optical ports of the module need to be terminated with an optical connector or with a dust plug in order to avoid contamination.

Notes:

1. QSFP-DD uses common ground (GND)for all signals and supply (power). All are common within the QSFP-DD module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.
2. VccRx, VccRx1, Vcc1, Vcc2, VccTx and VccTx1 shall be applied concurrently. Requirements defined for the host side of the Host Card Edge Connector are listed in Table 6. VccRx, VccRx1, Vcc1, Vcc2, VccTx and VccTx1 may be internally connected within the module in any combination. The connector Vcc pins are each rated for a maximum current of 1000 mA.
3. All Vendor Specific, Reserved and No Connect pins may be terminated with 50 ohms to ground on the host. Pad 65 (No Connect) shall be left unconnected within the module. Vendor specific and Reserved pads shall have an impedance to GND that is greater than 10 kOhms and less than 100 pF.
4. Plug Sequence specifies the mating sequence of the host connector and module. The sequence is 1A, 2A, 3A, 1B, 2B, 3B. (see Figure 2 for pad locations) Contact sequence A will make, then break contact with additional QSFP-DD pads. Sequence 1A, 1B will then occur simultaneously, followed by 2A, 2B, followed by 3A,3B.

About Skylane Optics

Skylane is a leading provider of transceivers for optical communication.

We offer an extensive portfolio for the enterprise, access, datacenter and metropolitan fiber optical market as well as for smart home applications and home networks.

We cover the European, South American and North American market with a strong partner network and have offices in Belgium, Brazil, Sweden and USA.

Our offerings are characterized by high quality and performance. In combination with our strong technical support, we enable our customers to build cost optimized network solutions.

We offer an extensive range of high-quality products including transceivers (Optical and copper), Active Optical Cable (AOC), Direct Attach Cable (DAC), Mux/Demux, Coding Box.
